

Moving up to new horizons.  
LEITWOLF®.

 LEITWOLF

*Pinotti*

A clear design brief:  
technological leadership  
and outstanding design  
in the ultimate groomer.  
LEITWOLF®, the generation  
of the future.

Look.

Listen.

Test.

Climbing into the future.  
LEITWOLF®, the unsurpassed generation.

LEITWOLF®. The leader of the pack. A good name for a great groomer to lead the way on the demanding terrain of winter services. The LEITWOLF® combines futuristic design and technological intelligence for a whole new world of slope grooming. A groomer that puts the peak into the power and

the driver in control of every situation. Fast and maneuverable, with the heart of a mountain-climber. A loner with a following between the Alps and the Andes, the Rockies and the Himalayas, wherever the snow is there for the fun of it. LEITWOLF®, the unsurpassed generation.

When night falls,  
LEITWOLF® rises to the challenge.

And the groomer is quick off the mark – making wide tracks under agile power for a unique coverage of more than 100,000 square meters an hour on the most challenging terrain. On board of the LEITWOLF® there is silence.

Pure power for perfect pistes.  
A powerful performer – in re-  
strained kind of way. Like the  
low fuel consumption, minimum  
maintenance requirement, long  
service life and high resale value.  
LEITWOLF®, a reliable partner.  
Just what you always wanted.

The inner qualities of the LEITWOLF® are expressed in powerful lines.

A new standard of aesthetics, too. The powerful lines are the hallmark of Italian design from Pininfarina. No frills. Just sheer good looks. Form follows function. Every detail is there for a reason, and the reason is always convincing. Plus an ultralight tubular space frame as the basis. Plenty of glass and aerodynamics to give the bodywork a futuristic touch.

Inside, the cab is a spacemaker and ergonomic masterpiece. A clear message, too, from the striking logo. You are looking at a real leader. The leader of the pack. LEITWOLF®.

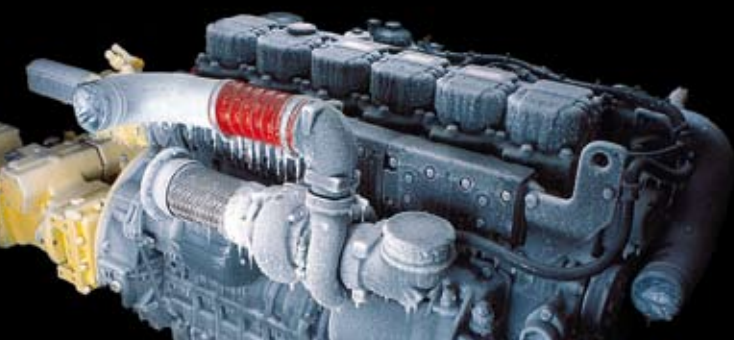

A big heart,  
with an economical vein.

New Common Rail Diesel

Only the best is powerful enough: a MAN turbocharged diesel engine with a displacement of 12.8 liters producing a convincing 435 hp and a bullish torque of 2100 Nm at 1000 to 1200 rpm. That gives the LEITWOLF® the bite needed to command respect at all times. Sensational cold start performance at high altitudes.

Pollutant emissions well below the limit values. A product of the Euro 4 family and in full compliance with Euromot III. Low fuel consumption and a generous 210 liter tank mean fewer stops for refueling. LEITWOLF®, the perfect match between performance and economy.

Moving technology. Perfect and reliable in every situation.

On the move. A new and unbeatable driving force in the world of slope grooming. The LEITWOLF® is a free and fast mover. Thanks to the new hydraulic travel gear. Plus enhanced hydropneumatic suspension for vibration-free working and an even smoother ride. On hard terrain, over the bumps and through the hollows, and under the most gruelling working conditions, the

LEITWOLF® adapts to every situation. Reliably and flexibly. Like in the service bay. With easy operation of the tilt cab and hinged rear deck. Individually or both together. Plus removable fairing. LEITWOLF®, making child's play of maintenance work.

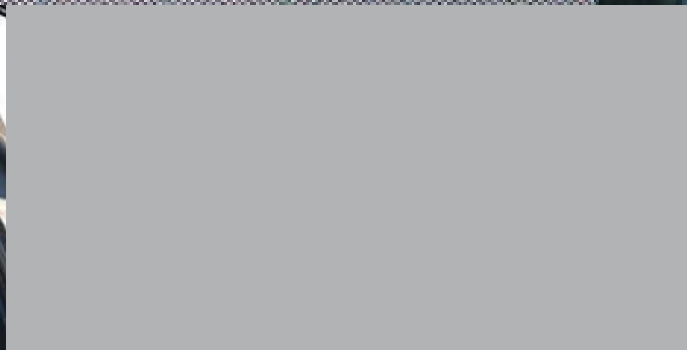

Comfort is no luxury.  
It is the path to performance.

Everything where it should be when it should be. In the spacious LEITWOLF® cab comfort is standard – new ergonomic seats, hinged armrest control assemblies, convenient central locking. And automatic temperature control for a pleasant working climate. Plus all the details, like the cellular phone charging unit, cigarette lighter, radio with CD player, and the cup holder.

Visibility in the LEITWOLF® is a bigger issue than ever before, with all-round tinted windows for the big picture and electric mirrors for all the details. See and be seen is the thinking behind the glare-free xenon headlights. Of course the LEITWOLF® has full ROPS certification – a reassuring thought while you sit back and enjoy the ride.

Keeping a grip on things.  
Sensitive electronics for a strong hand.

A quick glance at the central color display. A gentle pressure on the joystick. A direct command via the keyboard. No jungle of levers, but full concentration on just a few clear controls.

What you do not see is equally exciting. The LEITWOLF® combines multiple state-of-the-art electronics in a single control system. All the modules are from the same manufacturer. Everything is a perfect match.

Nothing is left to chance. An overriding fault monitoring system guarantees maximum safety and reliability. Even at testing times. With the LEITWOLF®.

**WINCONTROL.**  
The LEITWOLF® Winch with the Unique Pulling Power Technology.

In a new development, our engineers have successfully further optimised the pulling power control of the drum winch. WINCONTROL ensures the most efficient use even in the most difficult working conditions. Thanks to the electronic controller that takes over the pulling power control, it is very easy to handle

the winch. The driver is offloaded and the pistes are more perfect than ever. From now on, incorrect operation and premature cable wear are things of the past. WINCONTROL will be installed in the LEITWOLF® as a standard feature. Cable lengths ahead: the LEITWOLF®.

Rolling out the white carpet with LEITWOLF®.  
The number one in precision slope grooming.

The operator friendly blade and tiller adapt to any terrain with sensitivity and precision. With clever tiller technology, the POWER TILLER consisting of 2 flexible shafts or the triple-split Triplex-tiller provide the highest performance effortlessly. Whether hilly or flat. Steep or level. This perfection, however, is found in the details.

The new hydraulically controlled side finishers for the POWER TILLER and the Triplex-tiller ensure even more perfect pistes. They can be controlled separately and are raised automatically along with the tiller. The hydraulic folding of the two side finishers guarantees simple and nimble manoeuvring even on difficult terrain.

LEITWOLF® even makes tracks with a difference. The newly designed crosslinks and grousers guarantee outstanding hillclimbing and added thrust. LEITWOLF® passes the test of daily work for the finest slopes and fun parks in the world.

Not everything can be shown here.  
The LEITWOLF® is something  
you have to see for yourself.  
When shall we meet?

Powerful, innovative, in the lead.
